Spray Gun Cleaning Machine

ALMAX
Professional Painters Tools

Star Wash Spray Gun Cleaning Machine

Suitable for either solvent or water borne paint systems.

Automatic spray gun cleaning machine can clean two guns and cups at once.

Powerful single diaphragm pump provides a strong pulsating spray to clean both gun and cup efficiently.

Stainless steel cover and lid with polyethylene tank for long life.

Safety cut out switches machine off as soon as lid starts to open.

Spray Gun Cleaning Machine

ALMAX
Professional Painters Tools

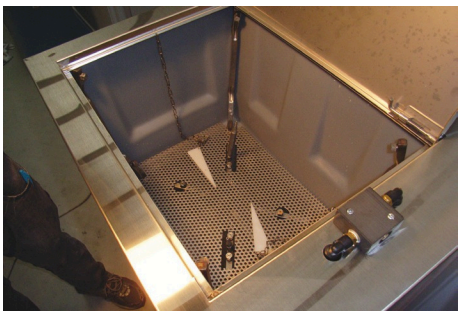

Powerful air operated diaphragm pump with silencer and pressure regulator.

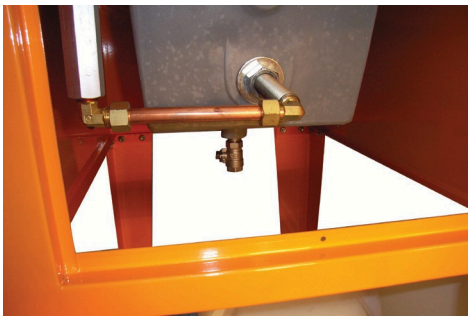

Safety control valve stops machine unless lid fully closed.

Load spray gun onto spray nozzle and hold trigger open with wedge provided.

Solvent recycles well above the bottom of the tank. This allows the sludge to settle. Water can be filled to just below the outlet and this also helps keep the solvent cleaner.
