

Eco-Clean Decorators Cleaning System

A mobile cleaning station to provide decorators with an economical and environmentally friendly cleaning facility, to clean brushes and tools. Uses Uni-Coag paint separating technology to extract the paint from the cleaning water.

Uni-Coag

Once tools and brushes are washed, the dirty waste paint water is mixed with Uni-Coag using the mixer (supplied).

After a short period of time the paint particles adhere to the Uni-Coag powder and finally leave clear water separate from the paint.

The basin is then emptied through a fine mesh filter which catches the paint and lets the water run through. The paint can be left to dry out and disposed in solid waste bins.

The clear water can be sent into the waste water system.

Main Features

- Strong steel construction, powder coated body
- Mobile on wheels, with two braked wheels
- Water filtration and treatment allowing for non hazardous disposal
- High pressure water gun for rinsing
- Flow-thru stiff bristle brush
- 40 ltr water reservoir
- Low running costs

Item Code: UDC-500

Technical Information

Dimensions	H 1120 x W 860 x D 660
Weight	35kg
Power	240v
Pressure	3-4 bar
