Solvent Recyclers save you money!

Licensing, ever-increasing waste disposal costs and environmental pressures have seen an upturn in the use of solvent recyclers. The solvent recycler, by a process of distillation, turns contaminated solvents into clean, re-usable solvent.

KEY BENEFITS OF RECYCLING:

- **Costs savings:** By recycling you reduce your solvent purchase and hazardous waste disposal costs
- **VOC reduction:** In many cases VOCs can be reduced by recycling
- **Health and safety benefits:** Reduce your health and safety risk with reduced waste solvent held on site
- **Environmental:** Recycling is good for the environment
