

ALMAX Dellaria-100 Dehumidifier – New Zealand’s premium industrial dehumidifier.

Portable dehumidifier to solve paint and plaster drying issues, and reduces drying times for concrete, plaster and timber.

Enables indoor humidity levels to be controlled providing an optimum working environment. The Dellaria-100 is suitable for all trade and hire applications.

Frame

- Frame and side panels are powder coated steel for strength and durability

Condensate Lifting Pump

- Lifting pump allows for condensate water to be removed up to a height of 3.5m
- Alarm to stop dehumidifier if any fault with the pump
- Easy access pump for connecting or cleaning

Air Filter

- Washable, high efficiency filter

Refrigerant Circuit

- Quality condenser with copper pipes and aluminium fins
- Aluminium evaporator coil reduces power consumption even at low humidity

Fan

- Axial fan, statically balanced for durable and long lasting

Microprocessor

- Controls the defrosting cycles with hot gas
- Refrigerant: R1234yf
- Weight: 45kg
- Size: 560 x 800 x 520mm
- Air flow: 550mc/h
- Manufactured in Europe
