Apollo HVLP Air Spray
Pressure Pot Kit

ALMAX
Professional Painters Tools

Apollo HVLP Air Spray Pressure Pot Kit for fine finishing.

For the ultimate finish on kitchen cabinets, joinery, metal components, composites, motor vehicles and more.

Uses standard workshop compressed air supply to provide very low overspray and a top quality finish.

The Apollo A7700 HVLP spray gun can be customised to any spray pattern and fitted with many different combinations of air cap and tip for the perfect result.

Ten litre pressure pot provides trouble free paint supply to the spray gun.

Fluid filter traps specks or grit that might otherwise block the gun tip.

Very flexible air and fluid lines are supplied in a 5 metre length as standard, but can be ordered to any length.

Separate air control for pressure pot and spray gun to enable any finish required.
