

Mistral Air Fed Respirator Kit

Complete kit for respiratory protection when spray painting.

An air fed respirator – with breathing quality air supplied from an air compressor – is the mandatory requirement when spraying paints containing isocyanates.

An air fed respirator is also highly recommended for health and safety when spraying with any paints, to provide maximum protection from atomised contaminants for the users lungs, eyes and skin.

The Mistral Kit contains:

- Full face lightweight visor
- Wide visibility crystal clear lens
- Quick adjustment head band
- Holds in 'heads-up' position
- Flow warning gauge
- Waist belt carbon filter and safety regulator
- Two stage wall mounted air filtration set with couplers
- 10 piece replacement 'tear-off' visor covers
- 1.2 metre hose set for spray gun
- Gasket sealed visor storage container
- Replacement filter elements available
