

Save money by Solvent Recycling.

Licensing, ever-increasing waste disposal costs and environmental pressures have seen an upturn in the use of solvent recyclers.

The solvent recycler, by a process of distillation, turns contaminated solvents into clean, re-usable solvent. You save money all the way!

Features:

- Fully automatic working cycle based on solvent vapour temperature, timed cycle or a combination of both
- Manufactured to EExd explosion proof rules
- Digital display panel with touch screen operation, diagnostics and alarm functions
- Up to 9 set points can be programmed for different solvents
- Stainless steel tank
- Removal of residual product by pivoting the tank or waste disposal bag
- Air cooled condenser
- Automatic loading option available
- Cycle time: 4 – 6 hours

Technical Information	IST-22	IST-42	IST-62
Electrical: 230V 1 phase 50Hz	2.5kw	3.2kw	-
Electrical: 400V 3 phase 50Hz	-	-	4.5kw
Operating Temperature	50–190°C	50–190°C	50–190°C
Height	1100mm	1200mm	1200mm
Width	650mm	650mm	650mm
Depth	950mm	950mm	950mm
Weight	85kg	115kg	134kg
Capacity	25 litres	42 litres	62 litres

How to recycle:

Key benefits of recycling:

- **Costs savings:** By recycling you reduce your solvent purchase and hazardous waste disposal costs
- **VOC reduction:** In many cases VOCs can be reduced by recycling
- **Health and safety benefits:** By reducing the quantity of waste solvent held on site you reduce your health and safety risk
- **Environmental:** Recycling is good for the environment
