

ALMAX Fresca 90 commercial and industrial dehumidifier.

Proven by
New Zealand
painters for
increased
workplace
efficiency.

Essential for use when painting, and other trade work in the range of climatic conditions experienced in New Zealand.

A dehumidifier helps solve paint drying issues, and reduces drying times for concrete, plaster and timber.

The Fresca 90 enables indoor humidity levels to be controlled providing an optimum working environment.

Use in an enclosed area of up to 250 square metres to remove moisture from the air.

Also great for moisture removal in gyms, sports club changing rooms, flood damaged rooms and more.

- New discharge pump removes collected moisture automatically
- Unique quick removal pump for easy cleaning
- On-site dust protection cover
- Quick access front filter
- Mobile unit on easy roll wheels
- Sturdy powder coated steel casing
- Digital controls, timer setting, humidity target setting
